

Regenerative Agriculture:

1. [Farmer's Footprint](#) has the goal of converting 5 million acres of farmland to regenerative agriculture by 2025. By doing so, we'd offset all greenhouse gas emissions produced in the U.S.
 - They are a non-profit organization offering holistic approaches to support farmers, rebuild our soil, and preserve our food independence.
 - They are a coalition of farmers, educators, doctors, scientists, and business leaders aiming to expose the human and environmental impacts of chemical farming and offer a path forward through regenerative agricultural practices.
 - They are a documentary film series exploring the stories of farm families on the vanguard of regenerative agriculture transition and the health and environmental impacts at stake.
 - See the first 20-minute installment in their series [HERE FREE](#):
 - Follow Farmer's Footprint on [Facebook](#).
2. [Kiss The Ground](#) is a great resource for the general public. Plenty of education, resource guides, online webinars and materials to help you learn and support the regenerative agriculture efforts. Offers an 8-week online course for Soil Advocacy Training. They work in partnership with Farmer's Footprint. Follow Kiss The Ground on [Facebook](#).

Research, Education & Advocacy:

1. [ZachBushMD.com](#) is the website of Dr. Zach Bush, one of the few triple board-certified MD's in the country, former cancer researcher, clinic operator and the creator of Restore and founder of the non-profit Farmer's Footprint. Follow Dr. Bush on [Facebook](#).
2. [Stephanie Seneff, Ph. D](#) is a Senior Research Scientist at MIT. Her quest to uncover causes to the alarming increases in autism lead her to studies on glyphosate. She has numerous published papers and videos on the topic. Follow Dr. Seneff on [Facebook](#).
3. [Mom's Across America](#) is an active and very current source of information. Started by a mother of three young boys, each with chronic, in some cases life-threatening, allergies to GMOs and toxins in the food supply. Their goal is to raise awareness about toxic exposure, empower leadership, and create healthy communities. Follow them on [Facebook](#).
4. [The Cornucopia Institute](#) is a great source for helpful scorecards and guides on companies, products, issues, education, and how your politicians vote. Their goal is to conduct research and investigations on agricultural and food issues to provide needed information to family farmers, consumers, the media and other stakeholders in the good food movement. Follow them on [Facebook](#).

Products and Services for Health:

5. [Restore](#) is a liquid dietary mineral supplement. This supplement supports communication of the bacteria in your microbiome and restores the tight junctions of your intestinal walls. Tight junctions are a velcro-like mechanism between every cell in your gut lining. Glyphosate destroys tight junctions which lead to leaky gut, then attack the other mega membranes held together by tight junctions including your blood vessels, the blood brain barrier and kidney tubules that detox your system.
6. [Thrive Market](#) is an online site that offers 25-50% off retail prices on 6,000+ organic, non-GMO, and sustainable products. They offer a carefully curated product selection that can be filtered by 70+ dietary and lifestyle needs. There is a membership fee of \$60 and shipping is always free on orders over \$49.
3. [Pulverize](#) is an alternative to the weed killer to RoundUp. Available at Home Depot, Ace Hardware and Amazon.com
4. [My Labs for Life](#), [Great Plains Laboratory](#) or the non-profit, [Health Research Institute](#) are all labs that can test your current glyphosate exposure.

Locally Grown Food Resources and CSA's

1. [Local Harvest](#) connects people looking for good food with the farmers who produce it. Our directory lists over 30,000 family farms and farmers markets, along with restaurants and grocery stores that feature local food. We call it a 'grassroots' directory because each member creates and maintains their own listing.
2. [Farm Match](#) is a directory of local farms and all their pick-up locations nearest you.
